Training in Energy and Carbon: Power Excel Programming – Macros and beyond. The power of VBA

Course Outline

You're a whizz at excel formulas but you want to learn more. You heard about macros, and want to do more with them. Then this is the course for you. This is a master class in unleashing the power of excel using its inbuilt programming language VBA.

What took you 6 days before will only take one. This is a hands on course where we will show you how to build spreadsheets that can run themselves. We run two course one which is more introductory and the other a super master-class
