

Energy-Redefined

Training in Energy and Carbon: Unconventional Oil and Gas

Introduction

Energy Redefined is a company based in Scotland UK, focusing on providing innovative solutions to energy companies navigating the transition to a Cleaner Economy. We are a clean energy intelligence company collecting hard to find data, processing and analyzing it to write reports, consult and provide training. We are a small company providing innovative services to those companies operating in the Energy arena. We create real actionable guidelines and provide valuable alternative insights. Although we are small we have access to a network of specialists in risk management, smart metering, energy economics, Carbon trading and offsets, technology and operations.

Overview

This course focuses on the growing area of unconventional oil and gas fields. This course will enable you to:

- Understand what unconventional production is
- Where the Production areas are and how they differ
- What the economics of these typically look like (Costs etc)
- How they differ across regions
- The environmental impact liability associated with them

Course Content

- Introduction to unconventional productions reserves and production

- Tight oil and gas
- CBM
- Heavy oil
- Tar/Oil sands
- Gas hydrates
- Economics of Unconventional production vis a vis conventional production
- Risks and challenges
- Unconventional product Pricing
- Environmental impacts
- Technology and the future of unconventional

Why you might want to go on one of our Courses

Some of the greatest challenges faced by governments and businesses today are concerned with energy. It is now widely accepted that there needs to be a shift in the way we think about this valuable resource, both where it comes from and how we use it.

This essentially means that there is a growing need for a better use of the existing fossil resources. This presents a significant opportunity for businesses and individuals who have expertise in this field.

Energy Redefined was set up in 2009 to help companies in the energy arena understand future business opportunities. We have provided advice, data and analysis to some of the leading lights in this field and now we are now offering training materials to enable you to start this transition.

Who typically attends our Courses:

- General Managers
- Carbon Managers
- Economists
- Commercial and Strategic managers
- Lawyers
- Aspiring Carbon Professionals

➤ Aspiring Energy Professionals
